

Emergency Plan for Staff Feeding Protocol for Youngstock

Prepare feed fence:

*e.g. Sweep/remove feed refusals to end of passageway/clean out trough.
Instructions for disposal of waste feed from youngstock (e.g. remixed or offered to another group?):*

Ration information and mixing protocol:

Load wagon in correct order of ingredients as listed in table below.

RPM's and length of time mixer PTO needs to run to mix feed:

RPM's:

Mixing time:

Other instructions for feeding and mixing:
*e.g. silage pit face management and cover removal
switching silage pits (gradual change)*

Mix size (number of youngstock):

Feeding out time:

Review daily:

- Amount of feed not consumed and adjust for next feeding to reflect changes in youngstock numbers and intake per animal i.e. ensure the correct number of portions are fed per number of animals (within 5%). Otherwise ask nutritionist to reformulate ration.
- Major changes in feed consumption should be reported to manager/nutritionist.
- Assess feed stocks and report to appropriate person for re-ordering in plenty of time.
- Assess water troughs are functioning properly and clean out at least once a week (scrub with a brush).
