-  Fence
-  Water Source
-  Neighbouring Properties
-  Fertiliser Store
-  Straw Store
-  Livestock Exit Points
-  Emergency Assembly Points
-  Power Lines
-  Mast

This map is purely illustrative and not exhaustive. When mapping your own property consider the risks and resources present on the ground. Use our accompanying FAS Farm Wildfire Plan Template to help identify risks and resources that need to be marked on your own map. Consider access routes and evacuation routes, clearly marking routes accessible only with an off-road vehicle.

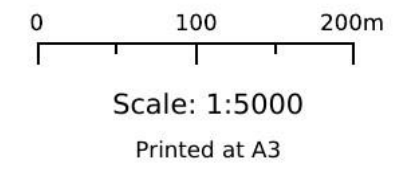

Wildfire risk management planning is most effective when it is part of a wider community effort. Your local Fire and Rescue Service, neighbouring land and property owners/occupiers and your broader community should all be part of the conversation.
