New Entrants- Records

SRDP FARM ADVISORY SERVICE

Welcome

Falls of Lora Hotel, Connel
12th February 2018

AGENDA

SRDP FARM ADVISORY SERVICE

- The whole point…..

- Sheep Records

- Cattle Records

- Pig Records
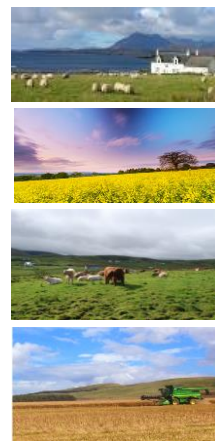

Statutory Requirements

- Stock Identification
- Movements of Stock
- Medicine Records

Stock Identification - Why?

- Traceability – Scottish/UK/EU law
- Food safety
- Biosecurity – need to know what stock are where

Need to do…

- Register with SGRPID – get a CPH number (for your holding)

- Register with Animal Health – get a flock/herd number (unique ID number for your stock)

Sheep

Tagging & Recording

ID and Traceability

Tag Legislation

Colours used

- Electronic tags can be any colour in Scotland
- They must be yellow in England and Wales
- Match up tag when bolus is applied is black
- All replacement tags (applied to purchased sheep) will be red (including EID)

Tagging Regulations

- All sheep must be tagged by the time they reach 9 months old
or when they leave the holding of birth

- Slaughter Lambs:
    - Can be tagged with a single EID slaughter tag displaying the flock number only.
    - A pair of EID tags can be used for slaughter lambs but full reporting will apply.

- Breeding sheep born after 31st December 2009:
    - Double tags - one EID and one visual.

Tagging

- Recommended left ear standing behind

The electronic tag
should be inserted in
the left ear as you look
from behind the sheep

Sheep Records

- Need to record
  - When sheep arrive
  - When sheep leave/die
  - When sheep are ear-tagged
  - When sheep are replacement-tagged

(see Holding Register)

SAMU Documents

- All moves must be accompanied by a movement doc and reported within 3 days
- Full EID sheep must be individually recorded
- Slaughter tags can be recorded in a batch (flock no only)

Tagging - Slaughter / Store sheep

| To be slaughtered before one year old | → | Apply a single electronic slaughter tag at 9 months old or when leaving holding of birth | → | UK 123456 | ← | EID |

Record animals - Enter date of tagging, flock number, number in batch

Record of Identification of Animals

1 Date of Identification	2 Identification of animal(s)	3 Number of Animals Identified	4 Year of Birth	5 Breed	6 Genotype (if known)	7 Own Use
15/08/2010	UK523456	47	2010	Blackface		Slaughter lambs tagged

When moved off enter flock number and numbers moved within batch

Tagging - Home bred breeding sheep

SRDP FARM ADVISORY SERVICE

To be kept on farm beyond 12 months of age → Full EID tag (Double tag ;one electronic) at 9 months old or when leaving holding of birth → UK 0123456 00212 / UK 0123456 00212 ← EID
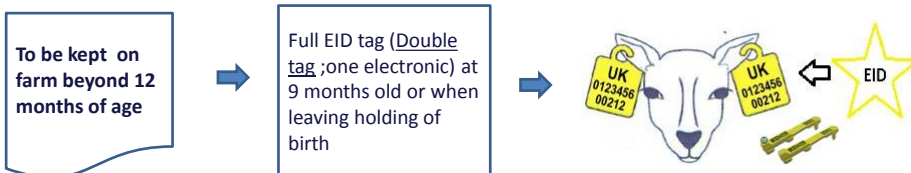

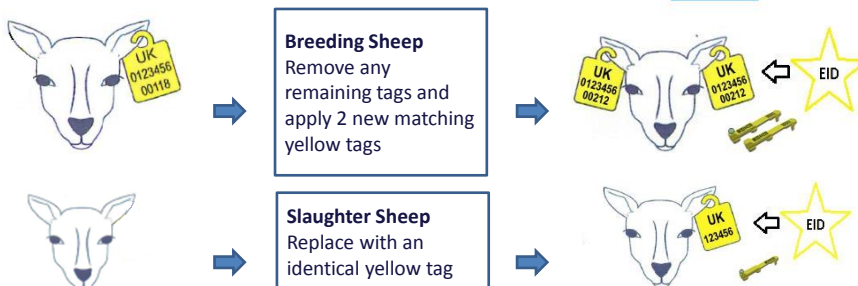

Record individually - Enter date of tagging, individual flock numbers

Record of Identification of Animals

1 Date of Identification	2 Identification of animal(s)	3 Number of Animals Identified	4 Year of Birth	5 Breed	6 Genotype (if known)	7 Own Use
30/09/2010	UK012345600118-218	101	2010	Blackface		*Ewe lambs tagged for wintering*

Retagging – bought in sheep

Breeding Sheep
Remove any remaining tags and apply 2 new matching red replacement tags

Slaughter Sheep
Replace with an red replacement tag

Record Replacement - date, individual flock number and original tag, reason

Record of Replacement Tags

Date of replacement	Replacement Identifiers:	Previous identifier:	Comments/ Reason for Replacement
25/10/2010	UK012345600112	UK052345600118	*Remaining tag removed. Replaced with two matching Red tags*
25/10/2010	UK123456	UK523456	*Slaughter tag replaced with Red slaughter tag – bought in animal*

Recommendations

Retagging sheep all ages

- Make sure <u>any tag</u> replacements are recorded

- Make sure you have a stock of red EID tags on farm

- Tags should be replaced **within 28 days** of discovery.

- Any red tagged slaughter sheep must be slaughtered by 12 months
  - **CANNOT be upgraded**

Tagging Tips

✓ Use tags sequentially - *UK050123 400114 – 00213*

✗ Don't throw away damaged tags
– keep a note of them

✓ Tag before moving (**before 9 months old**)

Sheep Tagging – Common Errors

- Slaughter tagged sheep not upgraded to full EID by 12 months of age. (Not allowed > 12 mths).

- Sheep of an age requiring tagged - never tagged

- Excessive number of sheep with missing ear tags

- Failure to use red replacement tags for re-identifying purchased sheep

Continuous Register:
When a sheep arrives/leaves/dies

SR DP FARM ADVISORY SERVICE

Continuous Register for Calendar Year 20_ _
Record movement details within 48 hours. Refer to page 20 of this booklet for advice on completion.
Annual Inventory as at 1st January: Date entered: Record by 1st February

Date	Event Eg movement on/off /dead/lost	Number of animals	Identification: Complete or refer. Individual numbers required for double tagged animals. Make clear number of animals with each flock mark for single tagged animals	CPH/Location Animals moved to or from	Haulier's name & registration number	Running Total	Own Use
Example: 25/08/2010	Off	115	UK123456 – 50 lambs UK234567 – 50 lambs 15 cast ewes – not applicable	83/536/8300 Lanark Market	Self NL51 VDM	826	

Recording ON Movements

SR DP FARM ADVISORY SERVICE

- Animals moving on, over 12 months old, should have a pair of tags.
- You should record in your book (or separate sheet referenced at the back) the individual ID number of each animal.
- ScotEID – a facility that can be used in support.

Movements - General

- Make sure haulier information is complete
- Standstill period 13 days for sheep.
  - Exemptions:
  - Movement to slaughterhouse
  - Breeding rams (same applies for bulls)

- Separation facilities ….
  - Must be approved by SGRPID

Movements

- Must be reported within 3 days to SAMU
  - Unless moved through a **Scottish** Market or **Scottish** Abattoir
  - Or under a concession

- Can use the Movement Document
  - Retain slips for 3 years
- Can be by email or fax

Deaths

- Record as they happen

Continuous Register for Calendar Year 2010							
Total Number sheep/goats on holding as at 1st January: 623				Date Entered: 3/1/2010		must be before 1st Feb	
1	2	3	4	5	6	7	8
Date	Event:	Nos of Animals	Identification of animal(s)	CPH/Location	Hauliers	Running Total	Own use
25/08/2010	Dead	1	UK012345600118	Douglasbrae		660	
25/09/2010	Dead	1	UK012345 unkown	Douglasbrae		659	

- Death of animals yet to identified must be recorded

Records - Summary

✓ Replacement tag record

✓ Record of tagging

✓ Record deaths (commonly missing)

✓ Continuous records

✓ SAMUs – Movement Documents

✓ Keep for 3 years

Fact or Fiction

1. If you break a non-electronic EID tag; can you use the partner tag as a slaughter tag?

2. If selling sheep to a neighbour you much record the electronic tag numbers on SAMU slip.

3. You must use a Red Replacement tag for any sheep that loses a tag

4. If an animal has been tagged with a slaughter tag- it must be killed!

Exercise

Cattle Guidance

Tagging & Recording

Use the correct books!

Can be downloaded as excel spreadsheets from SG website

Tagging

- Primary tags
  - Big yellow plastic tags
- Secondary tags
  - Either the same as above or a small yellow plastic tag/metal tag.
- Tags need to be officially printed – you cannot make your own statutory tags.
- You *can* have a hand-written 'management tag' but needs to be in addition to statutory.

When to tag

- Beef Cattle
  - Both tags within 20 days of birth or before it moves off the holding of birth
- Dairy Cattle
  - At least one tag fitted within 36 hours of birth. Up to 20 days to fit the second tag. Both tags must be fitted before leaving birth holding within 20 days

Replacing tags

- Cattle should be retagged with identical ID

- Lost or illegible tags must be replaced on the animal, no later than 28 days after the loss is noticed

Passports

- Must apply within 7 days of the animal being tagged

- Must be applied for within a maximum of 27 days from the date of birth

- Can use software, CTS Online or pre printed application form

CTS Online

Cattle Records – use books

Movements - General

- Make sure haulier information is complete on moves off otherwise breach

- Report moves within 3 days

- Standstill period 13 days for cattle
  – Exemptions (see pack)

- Separation
  – Must be approved by SGRPID

What is Scotmoves?

– CTS "linked" holdings run by BCMS come to an end 31st December 2016.

RIP
LINKED
HOLDINGS

What is Scotmoves?

- From 1st January 2017 you will need to record cattle moves BETWEEN different holdings within a business using SCOTMOVES.
- ScotMoves system will allow producers to record movements between business holding without reporting moves to CTS
- Still a requirement to register births, deaths and transfers to other businesses (private sales) with CTS. Marts and abattoirs will continue to notify CTS as before.
- Why- CTS links not compliant with cattle identification legislation- risk of EU fine.

How it works?

- ScotMoves will be continually updated by CTS of cattle registered to main holding- therefore cattle ID should not need to be re-entered

- Additional holdings can be notified directly by using ScotEID.com or by phoning ScotEID @ Huntly (01466794323)

- Registration lasts for 364 days- automated renewal reminders will be sent. Additional holdings can be registered at any time.

What do I need to do?

- Register all additional business holdings connected to main holding

- Assign cattle to holdings by advising ScotMoves whenever moved from main holding

- Requirement to notify ScotMoves of movements within 48 hours following movement BUT can pre-notify ScotMoves- e.g. on a Sunday for moving on a Tuesday.

What is an additional holding?

Definition-"Separate holding WITHIN business
This includes:
- Seasonal lets
- Rented sheds
- Separate holding numbers within business
- Shared premises

Exceptions- where cattle can walk from one field to another through open gate on contiguous holdings or possibly where animals are walked between holdings on daily basis e.g. dairy

What are the benefits?

- ScotMoves is an online holding register for recording cattle between your business holdings

- ScotMoves knows location of all cattle in case of disease outbreak

- ScotMoves "moves" are NOT recorded on passport

- Calves born on additional holdings will be identified and registered using main holding number

Other info

- Still requirement to keep a separate on farm holding register however will not need a separate record of "within business moves"

- Not for sheep movements.

- Some cattle are NOT eligible
  - Cattle with BVD PI status- move to slaughterhouse only
  - Cattle with Notice of Registrations (NOR's)- no passport- need special BCMS license

Cattle Summary - Deadlines

Event	Deadline
Tag new born beef calf	20 days
Register New Calf with BCMS	27 days
Register Death	7 days
Register Private Move	3 days
Register within business move	2 days (ScotMoves)
Replace missing tag	28 days

DON'T MISS THE DEADLINE!

Cattle- Quiz

1. How many days to you have to replace missing tags?

2. Name all mandatory details that must be recorded in herd record for a new calf (5)

3. How many days to tag AND register new calf?

4. A cow has died- what should you do?

5. In what scenario can you apply for an exemption from ScotMoves?

PIGS

PIGS

- The Basic Requirements

  – Keeper Registration

  – Pig holding Registers

  – Identification of Pigs

  – Notification of Movements

  – Completion of Movement Documents

PIGS

Keeper Registration

- Notify APHA within 1 month
  - Keepers name and address
  - Address of the holding
  - The species kept

PIG holding register & ID

- Movement details (48 hours)
- Record of replacement ID
- Annual Number

- Ear tag
- Tattoo
- Slap mark

Movement & Movement Docs

SR DP FARM ADVISORY SERVICE

- ScotEID (Electronically, Phone, Writing)

- Pre notification

- Movement details on holding (within 3 days to Scoteid)
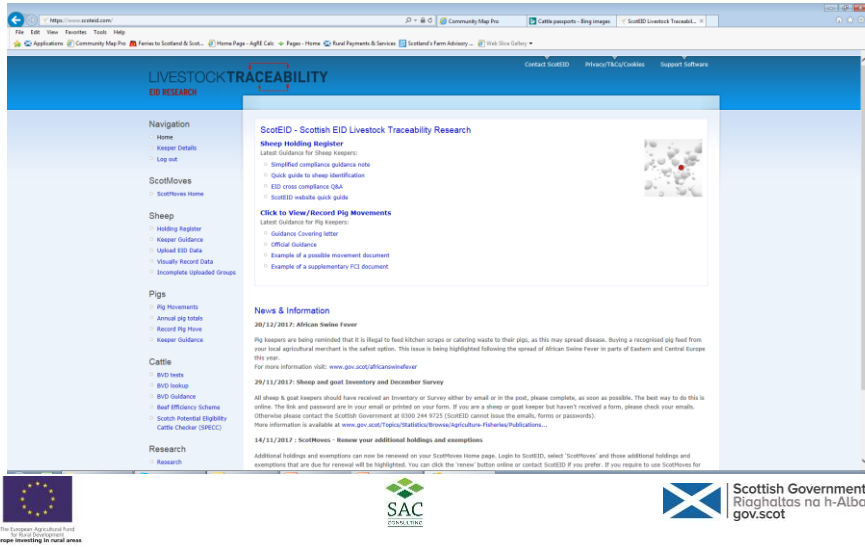

- No requirement for movement document

QUIZ

SR DP FARM ADVISORY SERVICE

1. Who should you notify Pig Movements too?

2. How soon after the move should the movement be notified?

3. Name two ways to ID a Pig (pre movement)?

4. Where would you register as a keeper of Pigs?

5. Name three things that must be kept in pig record book

ScotEID

Thank You
