

**Scottish
Water**

Trusted to serve Scotland

Biosolid Benefits

- Provide valuable organic content to soils
- Are a cost effective natural alternative to expensive chemical fertilisers
- Can help reduce your carbon footprint
- Are a valuable sustainable source of phosphate
- Can help reduce costs

Land Use Restrictions

There are restrictions on land use after application of biosolids e.g. livestock exclusions, or harvest intervals; these are detailed in the Safe Sludge Matrix. Your Scottish Water advisor can give advice on any restrictions that may apply.
