Extracting Meaningful Data out of Sheepdata Sheep - Basic

SR Advisory Service

National Advice Hub T: 0300 323 0161 E: advice@fas.scot W: www.fas.scot

Sheepdata is an extremely versatile program. Many users keep only statutory records with some sale or purchase lines.

For example; births, deaths, movements, sale/ slaughter lines, purchase lines, and deaths.

The program allows very comprehensive information to be kept. As with all packages, the more accurate the information that is put in, the more meaningful is the information that can be extracted.

This short publication shows the location of reports that can be run to provide you with some meaningful information from your records to help make your business more efficient.

What can we get out your Statutory Records?

Reports Basics

Other than a set of statutory and basic reports, other reports have to be created through Selective Reports here they can be edited, or deleted.

It is extremely useful to be able to tailor the report required.

All reports can be exported to different formats.

The report can also be text searched using M

Reports can be filtered by dates or criteria in the lower and upper boxes and ranked by entering 1,2,3 etc in the field you wish to rank the report by.
