

# Cross compliance checklist

## SMR 10 – Restrictions on the use of plant protection products

The aim of SMR 10 rules is to ensure that plant protection products are used correctly and to minimise their risk to humans, animals and the environment.

This applies if you use these products on your land.

Answer each question below with a yes, no or n/a to help check if you have adhered to the rules. If the rules are applicable to you, and you are compliant, your answers to the questions should be yes.

Picture above: Plant protection products being applied

- Are plant protection products used in accordance with label requirements, or as specified in the authorisation, permit or in any extension of use? For example:

- Are the products authorised or permitted for use on the crop, land or situation?
- Have products been applied using authorised methods?
- Have the application dates and harvest intervals been followed?
- Has the maximum dose/concentration been followed?
- Has the maximum number of applications been adhered to?
- Has the application dates/harvest interval been adhered to?
- Have the plant protection products been stored and disposed of safely?

Note: Record-keeping requirements for plant protection products fall within SMR 4 – Food and feed law.
