

Creep Grazing Beef Cattle

Calves graze the quality grass ahead of the cows

1-3 day grazing intervals
No barriers to line of sight

Target in

Fencing

- Single strand
- Wire at cow nose height >1m above ground

Target out

Rest period

- Be flexible
- Consider cows only in calculation
- Guide: 15-25 days to start

Benefits

- Calve growth rates
- Manage pasture quality
- Reduce weaning stress

- Or raise one post:

Beware, curious calves can knock the post and fencing down
